

# con brio (Japan, chiba)

## Development point

To operate 2 robots simultaneously, I connected large buttons and foot pedals to gamepad, so as to be able to operate a robot by forearms while operating the other by gamepad.

## Introduction of your team

【Inspiration, motivation to form a team】

For WRS2018, I participated in development team as a technical assistant. When I watched WRS2018 competition, a wish raised in myself to join WRS2020 as a competitor.

【Future outlook】

My job is software engineer related to mathematical algorithms. Needs from robot company is increasing recently, so I want to improve my robots more intelligently and prepare for future business.

Role	Name	Affiliation/Title	Specialty, Field of study
Team leader	Takuro Sasaki	private	Software development
