

SchoolChallenge

Team Saku (Pagasa in Philippines & Margaret girls in Japan)

Point of Robot Performance

In order to improve the school life of the students, so Pepper to solve the problems that the students have.

The point is that Pepper speaks like a friend to a student's question. He also can recognize the student's faces and understands who it is.

Team Introduction

[Problem Presentation]

More often than not, students forget about their requirements in school, which might be the cause for them to feel challenged or unmotivated; and the burden of constantly reminding them about such falls into the backs of teachers.

[Solution]

To solve these problems, Pepper will support student by telling students about scores, missing requirement, learning support, deadlines, schedule. To give motivation to the students, Pepper will also be having extra features such as giving words of encouragement and telling prophecies. This allows students to enjoy their school life to the fullest.
