

ONWAI (DE)

Development point

We compete with Limbo, an autonomous service robot that is designed to serve in various environments. Limbo can recognize people, understand spoken words and is interface-able by various devices. Limbo is highly customizable and adaptabvorstelle to individual requirements.

Introduction of your team

【Inspiration, motivation to form a team】
We are Onwai, a small team consisting of old homer@Unikoblenz members. With Onwai we aim to slowly escape lab environments and work towards affordable but functional robots that work in various environments.

【Future outlook】
We will continue the development and optimize production. Limbo should get an functional arm in the

Role	Name	Affiliation/Title	Specialty, Field of study
Team leader	Raphael Memmesheimer	Onwai, Phd. Student	Robotics, Artificial Intelligence, Image Processing
Support	Ivanna Kramer	Onwai, Phd. Student	Robotics, Artificial Intelligence, Education
Support	Nick Theisen	University of Koblenz, Phd. Student	Artificial Intelligence, Robotics, Image Processing
